

Post API Documentation

The post API allows for posts to be added to the database, removed from the database and for different get functions to be performed.

HTTP Method	URI	Action
POST	http://localhost:2015/posts/create	Add a post to the database.
POST	http://localhost:2015/posts/delete?post_id=0	Remove a post from the database.
GET	http://localhost:2015/posts/get?post_id=0	Get a post by id.
GET	http://localhost:2015/posts/filter?n=3	Get most recent posts.
GET	http://localhost:2015/posts/filter?n=2&community_name=cheesecake	Get most recent posts by community.
